

# Lobby Renovation Update

February 18, 2010

The Belt's Landing lobby renovation project is now well underway! The snow stole a little bit of time from the crew, but things are up and running once more.

During this initial two weeks, Cornerstone Contracting Company, Inc. has begun the demolition and removal of old wallpapers, glass trims, and old wooden trims. The new wiring for lighting and accessories also will be installed at this time. Finally, some of the handcrafted wooden trim buildouts on the columns will also commence.

As before, garage spaces 52 and 53 are reserved for the project. This will allow for minimal disruption to traffic flow and less clutter / debris on the interior during construction. **Residents should expect designated areas of the lobby to be closed at times (and partitioned off), especially during marble restoration.** At times, access to the front desk will be limited and may require walking through the garage and into the mailroom. Appropriate signage will be displayed at such times.

Please check back for more updates on the project as construction progresses.
